PROJECTS

Event Management System

- A website that gives the whole information about the live and upcoming events which are going on in the college, and let's student to participate in the event. Technologies used in this project are **Html, Css, Javascript,xampp**

Employee Management System

- I was responsible, for overseeing the development of the backend for an integrated Employee Management System. My focus was on ensuring that data handling was secure and efficient, within the frontend. I also designed a system that allows for future expansion and adaptability. **Software used: Eclipse, Tomcat Server, Coding Language: Java.**

Tic Tac Toe Game

- Designed and developed a tic tac toe game using **HTML,CSS, Javascript**. Implemented game logic, responsive design and multimedia elements to create an interactive and visual website.
